Overview

Meticulous Solutions is located in Lahore, Pakistan in the middle of Muslim Town, beside the Aabpara market. Our focus is solely on digital marketing, inclusive of web design and development, which we view as the true foundation to any effective digital strategy. Our team has constructed a wide variety of websites, ranging from municipal governments, army organizations such as the Lahore Golf Course and Country Club, international retailers as well as globally-focused technology providers and publicly-traded companies.

Across each of the industries that we serve our team focuses on the creation of content and development of web systems to better equip our clients to reach and communicate with their target audiences. For example, for the Examination system of Punjab Nursing Board we developed custom off the shore system to manage applications across the Punjab. We have created interfaces schedule test of divisional areas and functionality to print and dispatch result cards. With the LGCC, our team developed a private-member portal designed specifically to enable automate the members booking for the golf course and restaurants. In short, there is no system, API or challenge too great for our team to creatively tackle.

The core value of our organization is to ensure that all aspects of our projects are designed and developed to achieve the optimal user experience through customized web technology solutions.

Project Life Cycle

Software Development

ERP Development

Our ERP development approach, which sequentially integrates different functional areas (like Sales, Marketing, Finance and Supply Chain), our cost effective solution turns data into powerful analytical knowledge.

Workflow Development

Our unique blend of strategy, technology and creative implementation allows us to provide our clients solutions on time and within budget. Having unmatched technical personnel on board, we offer full range of solutions and services to cater your needs.

Software Development

Our aim to provide quality and reliable services in software development, support and software quality assurance areas. Developing technology based solutions with customer-centric mindset has proven to be the most critical ingredient in our success.

Hybrid App

Windows

Meticulous Solutions has a team of knowledgeable developers and creative designers that can implement mobile applications for handheld devices of varying complexity. Our applications are smart client and support amazon cloud computing. Our solutions are built and tested to function seamlessly on PDAs and Smart Phones, creating better efficiency and a decrease in cost for every business.

Why Us?

Experience

We are amongst the handful of original mobile and Facebook application developers that have been around ever since the iPhone and Facebook's API were launched

Versatility

From simple utility applications to large scale work flows and business applications; from custom web solutions to eCommerce platforms and entire product development, we've done it all.

Originality

We are fully aware of how hard it is to stand out online, so we have got the perfect team with a proven mix of skills that ensure the highest level of visibility and affinity

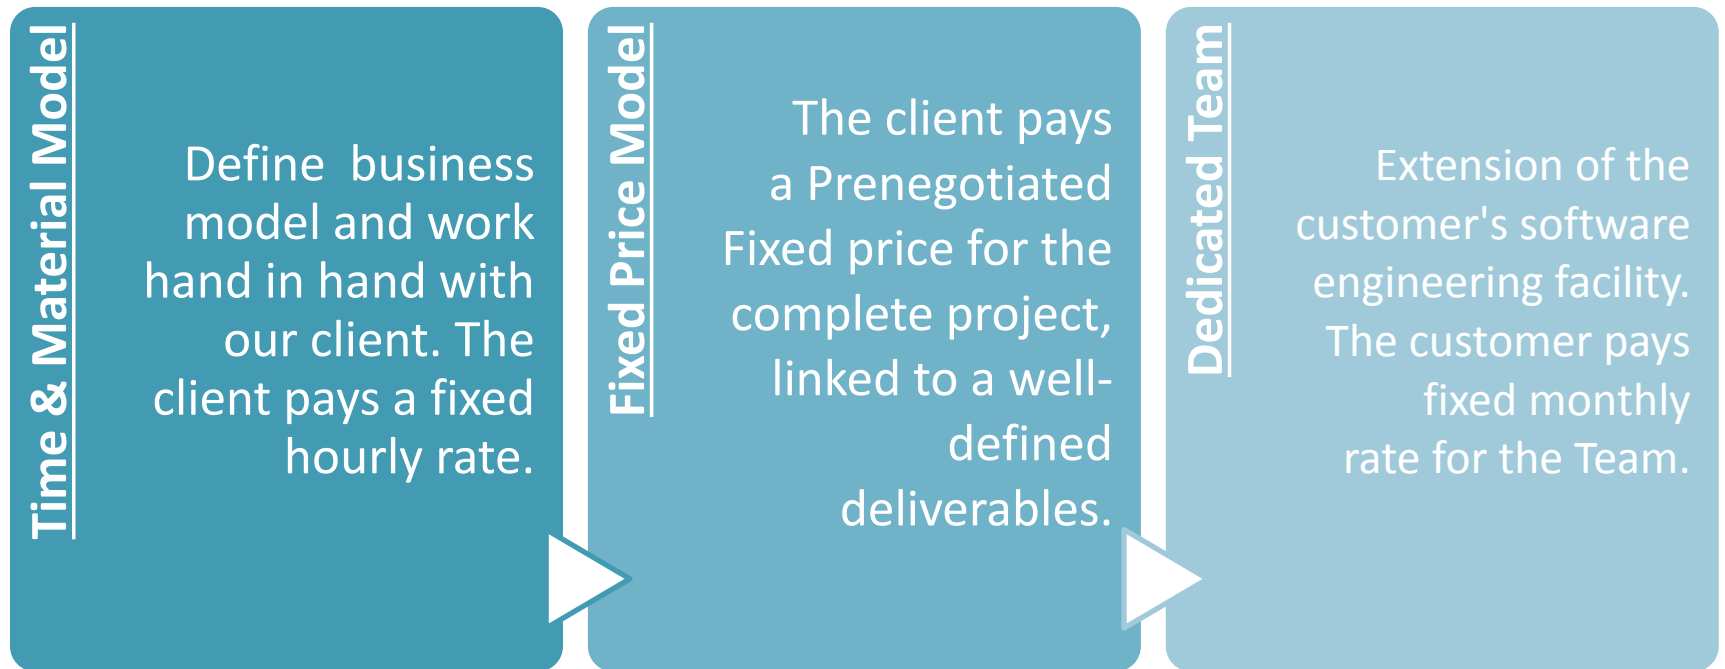

Diversity

Not only in our workforce but in the things we do. Watching developers take sides in our office is no joke

Consistency

Our clients are more than just clients; they are part of the Meticulous family, and that means an assurance that we will stand by them. This includes 30 days of free post-launch application support

Engagement Model

Client Relationship Life Cycle

Noticeable Ongoing Projects

SaudiKad ERP System | 2015 to present date

SaudiKad is an international construction company located in Saudi Arabia. Meticulous is currently in process of automating all the processes of entire company from employee hiring to inventory management. Meticulous has already shipped 6 out of 10 major modules that are in production at this fine moment. Meanwhile, Meticulous also designed and developed SaudiKad's web presence.

Global Mentoring Solutions | 2012 to present date

Meticulous was engaged by Global Mentoring Solutions to revamp the web design of their website main website and GMS Live Expert website. We developed both websites using WordPress, a popular CMS system, to help them make content changes on their own. Meticulous also helped them to channel their online leads to Salesforce so that they can keep them within the radar. Meticulous is continue to work on their day to day online campaigns and lead generation marketing.

Noticeable Ongoing Projects

Network of Angel Organizations – Ontario, Canada | 2015 to present date

NAO is a network of Angel organizations whose goal is to create new Angel investor groups and foster their success with information and educational tools to transfer best practices from successful Angels. Meticulous developed a public and a private portal for them. Public portal is developed to help entrepreneur learn about the process, practices and receive news, updates and press releases. Private portal developed to create a private space for all Angel organizations where they can share their experiences and market studies.

Lahore Golf Course and Country Club | 2013 to present date

Meticulous was hired to automate the work flow of the LGCC's ticketing system, member management, restaurant's orders and food purchasing. We developed an Android app to collect the orders from walk-in customers. Orders are auto dispatched to kitchen's screen for immediate preparation. Recently, we have been contacted again to develop biometric system to authenticate members on LGCC security gates. Meticulous is now on a retained services contract with the Lahore Golf Course and Country Club.
